4. FIRST AID

CHEMICAL EXPOSURE

- EYE CONTACT:** Check for and remove any contact lenses. Flush eyes with water for 15 min., holding eyelids open. Obtain medical attention.
- SKIN CONTACT:** Flush skin with soap and water for 15 min. Remove contaminated clothing and thoroughly wash clothing before reuse. Consult a physician.
- INHALATION:** Remove from exposure to fresh air immediately. If not breathing, give artificial respiration. Obtain medical attention.
- INGESTION:** If swallowed, rinse mouth with water if person is conscious. Do not induce vomiting unless directed so by medical personnel. Obtain medical attention. Loosen tight clothing such as a collar, tie, belt or waistband.

5. FIRE FIGHTING MEASURES

FLASH POINTS: Closed cup 45C (113F)

FIRE HAZARDS: Flammable in the presence of an open flame and sparks at temperature above the flash point.

EXTINGUISHING MEDIA: May be combustible at high temperatures. Extinguishing media appropriate to surrounding fire conditions. Small Fire: Use dry chemical powder. Large Fire: Use water spray, fog or foam. Do not use water jet. Emits toxic fumes under fire conditions (chloride, bromide).

HAZARDOUS COMBUSTION PRODUCTS: Hazardous decomposition products formed under fire conditions. Carbon oxides, hydrogen chloride gas, hydrogen bromide gas.

6. ACCIDENTAL RELEASE MEASURES

PERSONAL PROTECTIVE EQUIPMENT FOR SPILL CONDITIONS: Note that accidental releases may be subject to special state or local reporting requirements and other regulatory mandates. Check and comply with local laws and regulations. Do not allow chemical to enter drain. Avoid breathing vapor, mist or gas. Use gloves and other appropriate protective covering to avoid skin contact. Ensure adequate ventilation. Beware of vapors accumulating to form explosive concentrations. Remove all sources of ignition. Use goggles, face shield or other eye protection. Contain spill with an inert adsorbent such as vermiculite, sand or earth. Place spill material in a suitable container and hold for disposal. Wash spill site after pickup is complete.

7. HANDLING AND STORAGE

Store in a cool, dry place in tightly sealed containers. Keep away from heat. Take measures to prevent the buildup of electrostatic charge. Ensure good ventilation at the workplace. Practice good laboratory techniques when handling this substance. After using the chemical, wash hands thoroughly. Use adequate ventilation and avoid breathing vapor, mist or gas. Empty containers pose a fire risk and any residue should be evaporated under a fume hood. Keep away from incompatibles such as oxidizing agents, metals and alkalis.

8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

For routine operations wear safety glasses, latex gloves and a chemical apron to avoid contact with eyes, skin and clothing. Facilities utilizing this chemical should be equipped with an eyewash station and safety shower. Use adequate ventilation to keep airborne concentrations below the permissible exposure limits. (No PELs are listed for this chemical). Wash contaminated clothing before reuse. Wash thoroughly after handling.
